EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Thomas Hilliard on March 17, 2004. The application has been amended as follows:

2. The following changes have been made to the application in order to clearly describe the invention and to define the claimed invention over the prior art of record:

Claim 1:

- a) "said first scale, and", line 11, has been replaced with -- said first scale, and said supporting surface being substantially flat and positioned directly beneath and along the entire length of said finger-resting surface directly adjacent said upstanding section, and beneath said scale supporting section to permit smooth application of said guiding device on the working surface and an innermost edge of said first scale positioned closest to a free end of said upstanding section, and an outermost edge remote from said innermost edge, and forming a free end of said first scale such that an implement can be moved against said free end of said first scale, wherein the substantially flat supporting surface

cooperates with the scale supporting section to define a generally V-shaped cross-section, and wherein said guiding device has a solid cross-sectional configuration, and --.

- b) "an implement", line 13, has been replaced with -- said implement --.

Claim 7:

- a) "claim 6," line 1, has been replaced with -- claim 1, --.

Claim 9:

- a) "claim 6," line 1, has been replaced with -- claim 1, --.

Claim 13:

- a) "innermost edge," line 12, has been replaced with -- innermost edge and forming a free end of said first scale such that an implement can be moved against said free end of said first scale, and said supporting surface being substantially flat and positioned directly beneath and along the entire length of said finger-resting surface directly adjacent said upstanding section, and beneath said scale supporting section to permit smooth application of said guiding device on the working surface and an innermost edge of said first scale positioned closest to a free end of said upstanding section, and an outermost edge remote from said innermost edge, wherein the substantially flat supporting surface cooperates with the scale supporting section to define a generally V-shaped cross-section, and wherein said guiding device has a solid cross-sectional configuration, and --

Art Unit: 2859

- b) "an implement", line 18, has been replaced with -- said implement --.

Claim 21:

- a) "said first scale, and", line 10, has been replaced with -- said first scale, and said supporting surface being substantially flat and positioned directly beneath and along the entire length of said finger-resting surface directly adjacent said upstanding section, and beneath said scale supporting section to permit smooth application of said guiding device on the working surface and an innermost edge of said first scale positioned closest to a free end of said upstanding section, and an outermost edge remote from said innermost edge, and forming a free end of said first scale such that an implement can be moved against said free end of said first scale, wherein the substantially flat supporting surface cooperates with the scale supporting section to define a generally V-shaped cross-section, and wherein said guiding device has a solid cross-sectional configuration, and --.
- b) "an implement", line 12, has been replaced with -- said implement --.

- 3. Claims 6, 31, 33, 35, 37 and 39-40 have been cancelled.
